Dear Mrs Khoury-Prinsloo,

EVALUATION OF ROLE SAVER

Thank you for introducing us to the Roll Saver. We are of the opinion that this invention holds promise for the animal industry not only as a labour saving device, but also for saving on feed losses due to weathering and contamination with urine etc. By limiting wastage of hay in the paddock insect breeding areas should also be reduced. The Roll Saver may also be useful for the dairy industry. We are eager to conduct a research project to quantify the advantages of this invention.

Kind regards,

A handwritten signature in black ink, appearing to read 'Francois Siebrits'.
